## Professional Summary

Red Seal Journeyman Electrician and Building Automation Technician with over 10 years of experience commissioning, programming, maintaining, and optimizing commercial and industrial Building Automation Systems (BAS). Extensive experience with Schneider EcoStruxure Building Operation (EBO), Tridium EC-Net, Honeywell, Loytec, and Distech control systems. Proven expertise in HVAC controls, DDC programming, system commissioning, database configuration, graphics development, instrumentation calibration, and troubleshooting complex control and communication issues. Recognized for strong analytical skills, collaborative problem solving, and delivering reliable building automation solutions with a strong commitment to safety, documentation, and continuous improvement.

## Technical Skills

- Building Automation Systems (BAS) & Building Management Systems (BMS)
- Direct Digital Controls (DDC)
- Commercial HVAC Controls
- Schneider EcoStruxure Building Operation (EBO)
- Tridium EC-Net / Niagara
- Honeywell, Loytec, & Distech Controls
- HVAC Control Sequences
- System Commissioning & Functional Testing
- BAS Databases, Graphics, Alarms, Trends & Scheduling
- BACnet & Building Control Networks
- Instrument Calibration & Control Device Replacement
- Electrical & Control Troubleshooting
- Mechanical & Electrical Drawing Interpretation
- System Documentation & As-Built Updates
- SAP Maintenance Planning
- Client & Contractor Coordination
- Team Collaboration & Safety Leadership

## Professional Experience

### Convergent Technologies – Fort Hills, Alberta

**Automation Technician** | December 2023 – Present

- Maintain and troubleshoot Schneider Electric EcoStruxure Building Operation (EBO) Building Automation Systems supporting critical industrial infrastructure.
- Configure controller databases, graphics, alarms, trends, schedules, and operator interfaces.
- Diagnose communication issues involving BACnet networks, field controllers, servers, and operator workstations.
- Support server upgrades, controller replacements, and system expansions while minimizing operational downtime.
- Maintain system documentation and verify changes following commissioning activities.
- Coordinate work with operations, electricians, instrumentation technicians, and mechanical trades while maintaining strict safety standards.

#### **Fort McKay Alcor – Fort Hills, Alberta**

**Automation Technician** | June 2017 – November 2022

- Commissioned, maintained, and optimized HVAC Building Automation Systems including boilers, air handling units, make-up air units, unit heaters, and ventilation systems.
- Developed and modified DDC control sequences to improve occupant comfort, equipment reliability, and energy efficiency.
- Tested, calibrated, repaired, and replaced control devices, sensors, transmitters, actuators, and field instrumentation.
- Coordinated maintenance planning and scheduling using SAP while maintaining up-to-date system documentation.
- Led safety meetings and proactively promoted a culture of safe, efficient work execution.

#### **Convergent Technologies – Various Locations, Alberta**

**Electrician & Automation Technician** | March 2008 – May 2017

- Commissioned and programmed HVAC and building automation systems at industrial and commercial sites across Alberta.
- Installed and supported electrical infrastructure for automation systems, including EMT conduit installation, wire pulling, termination, and panel work.
- Designed and implemented custom graphical user interfaces for system monitoring and diagnostics.
- Collaborated with engineers and clients to support system design, testing, and post-install optimization.
- Maintained and repaired gas detection systems including Honeywell and Det-Tronics platforms.
- Provided mentorship and technical guidance to new team members; supported team-wide safety compliance.

#### **Certifications**

- Schneider Electric – Workstation System & Design (2023)
- Toastmaster International - Competent Communicator (2020)

- Honeywell – Care & LON Engineering (2018)
- Tridium – EC-Net4 (2017)
- Enerlon – SmartServer Applications (2015)
- Distech Controls – Distech Applications (2014)
- Alerton – HVAC Fundamentals (2014)
- Red Seal Journeyman Electrician, SAIT (2012)

## Education

- Ontario Secondary School Diploma, St. James High School (2004)
